Caren Gioannini, Code 452/454/565 SWSI Bulk Scheduling Enhancement Concept Review		Date

Both valid and invalid requests are saved to disk.

The flow of the diagram can be modified to better clarify its functions.

The set of buttons: "Submit", "Cancel", and "Save" will be reduced to "Submit" and "Cancel".

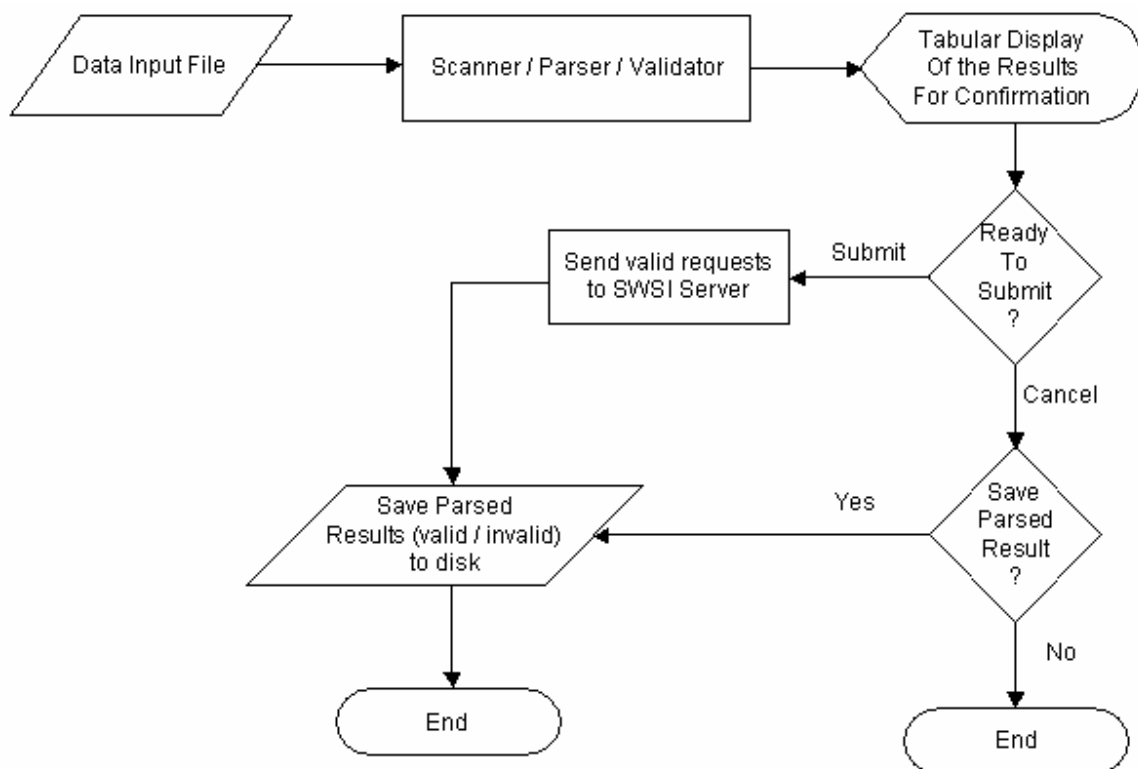

If "Submit" function is selected, it will save parsed requests to disk and submit each valid request one at a time to SWSI server.

If "Cancel" function is selected, it will ask the user whether he wants to save the parsed result to disk before canceling the batch submittal with a "Yes" or "No" dialog.

If the user selects "Yes", it will save the parsed result to disk and cancel the transaction.

If the user selects "No", it will simply cancel the transaction.

A new diagram is listed below:

		Caren Gioannini, Code 452/454/565 SWSI Bulk Scheduling Enhancement Concept Review	Date

The fields that will be ignored by the parser of SWSI for Bulk Scheduling are listed as follows:

Message	Data Item	Start Byte in Message	Number of Bytes
SAR	Request ID	3	7
	User ID	19	4
	Password	23	4
	Spare	31	7
	Spare	40	2
	Fix Pattern	71	1
RR	Request ID	3	7
	User ID	19	4
	Password	23	4
	Spare	27	1
	Spare	40	2
	Fix Pattern	71	1
SDR	Request ID	3	7
	User ID	19	4
	Password	23	4
	Spare	27	15
	Spare	49	4

For a detailed description of these fields, please refer to the new *452-ICD-SN/CSM Document* (formerly defined in the *Interface Control Document Between the Network Control Center Data System and the Mission Operations Centers*, 451-ICD-NCCDS/MOC, Revision 1, 1999).

A DCN, to the *Space Network SWSI Client Software User's Guide*, 452-UG-SWSI, will be developed to document the specific contents for the input file. The draft DCN containing this information is to be available for review November 19, 2004. Following a review cycle the DCN will be submitted to the SN CCB for formal approval.

REQUEST FOR ACTION (RFA)			
1. <i>Review Type</i> SWSI Bulk Scheduling Enhancement Concept Review		2. <i>RFA No.</i> CCR 452/168-03	
		3. <i>Review Date</i> July 7, 2004	
4. <i>Title</i> Need for "Filter For ..." Button			
5. <i>Action</i> Consider eliminating the "Filter For ..." button if its functionality remains associated strictly with the save function. It is currently redundant and somewhat confusing. The filter window could come up when the "Save" button is clicked.			
<div style="border: 1px solid black; padding: 5px;"> <div style="background-color: #cccccc; width: 100px; height: 40px; float: left; margin-right: 10px;"></div> <div> <i>Reference</i> Slide 22 GUI Window </div> </div>

3. <i>Review Date</i> July 7, 2004			
4. <i>Title</i> Client Workstation Minimum System Requirements			
5. <i>Action</i> On the SWSI website in the Client Requirements section (http://swsi.gsfc.nasa.gov/client/client.htm) and in the SWSI Client Software User's Guide (452-UG-SWSI) there are minimum hardware and software requirements specified. Since the client software is significantly changing for the SWSI BSE, it is recommended that these requirements be re-addressed. Specifically, there are two requirements that should be considered. They are: the amount of RAM and the amount of hard disk space required.			
Reference

4. <i>Title</i> Limited "Filter for Save" Capability			
5. <i>Action</i> Why limit the filter criteria for Extraction of Request ID's to just Minimum Creation Time and Maximum Creation Time? I can envision a user wanting to filter based on SUPIDEN, TDRS, Msg Class, or even Status.			
Reference Slides 22 and 23			
6. <i>Originator/Organization/Telephone No./E-mail</i> Donald T. Small/HTSI NENS CCE/301-805-3433/donald.small@honeywell-tsi.com			
7. <i>Assigned To/Organization/Telephone No./E-mail</i> Hoai Vo / HTSI/ 301.805.3937 / hoai.vo@honeywell-tsi.com Yuen-Han Kan / HTSI/301.286.1992 / yuen-han.kan@honeywell-tsi.com			<i>Due Date</i> 7/21/04
8. <i>Response</i> The filter criteria for the Extraction of Request IDs were focus to just Minimum Creation Time and Maximum Creation Time because creation time is the most logical field for the scheduling operator to filter a particular batch that he/she submitted recently. By setting the Minimum and Maximum Creation Time, one can narrow the requests to a smaller subset that matches the desired need. Yes, the "Filter For ..." button will rename to "Filter" and it will serve as a "real" filter for the requests in the window. A discussion to implement filter for other fields will be discussed in the SWSI SERB. Please also refer to RFA No. CCR 452/168-03.

REQUEST FOR ACTION (RFA)			
1. Review Type SWSI Bulk Scheduling Enhancement Concept Review		2. RFA No. CCR 452/168-10	
3. Review Date July 7, 2004			
4. Title Impact of BSE on SWSI Backend Server Performance			
5. Action A recent performance study of SWSI revealed that with limited manual scheduling in progress, backend server CPU utilization reached 100% for 3 to 4 minutes. The majority of the CPU utilization was consumed by the Oracle database process. Earlier this year, while Gravity Probe was conducting heavy scheduling, the SWSI backend server experienced performance-related problems. The concern is that the addition of bulk scheduling will exacerbate the SWSI backend server performance problems. Suggest that a specialized performance test be designed and executed to: 1. monitor SWSI backend server performance during one or multiple bulk schedule submissions 2. characterize the impact of bulk scheduling on SWSI backend server performance 3. develop workarounds if necessary

7. Assigned To/Organization/Telephone No./E-mail Merri Benjamin/HTSI /301.805.3313/ merri.benjamin@honeywell-tsi.com			Due Date 7/21/04
8. Response The SWSI maintenance team is aggressively looking into SWSI performance problems. We have already identified locations in database procedures that can be modified to improve performance. Investigation is also being performed on the current baseline application to try to optimize the unnecessary database access. The SWSI maintenance team will continue to investigate and implement solutions to current SWSI system to improve the recent problems reported. In addition, during the Bulk Schedule implementation, performance tests will be done to simulate the needs on the operational environment, and if necessary, workarounds like metering, will be developed in the design.
